About Me

I am an independent and self-motivated graduate looking for an entry-level position in the information & technology department where I can utilize the extensive knowledge I have gained during my course. Well-versed in technical field and excellent in working for new challenges

Projects

Personal Portfolio

The website has been built using HTML, JavaScript, and CSS, and features a range of interactive elements that engage visitors and make it easy for them to learn more about my skills, experience, and accomplishments. With its clean design and user-friendly layout, my personal portfolio is sure to leave a lasting impression on anyone who visits it.

Weather-App

My dynamic weather app is a professional-grade application built using a combination of HTML, CSS, and React JS. The app allows users to access real-time weather data for their location, including temperature, humidity, wind speed, and more. With its intuitive interface, customizable settings, and accurate data, the weather app is the perfect tool for users who need to stay up-to-date on weather conditions in their area.
